HOUSING PRICE ANALYSIS

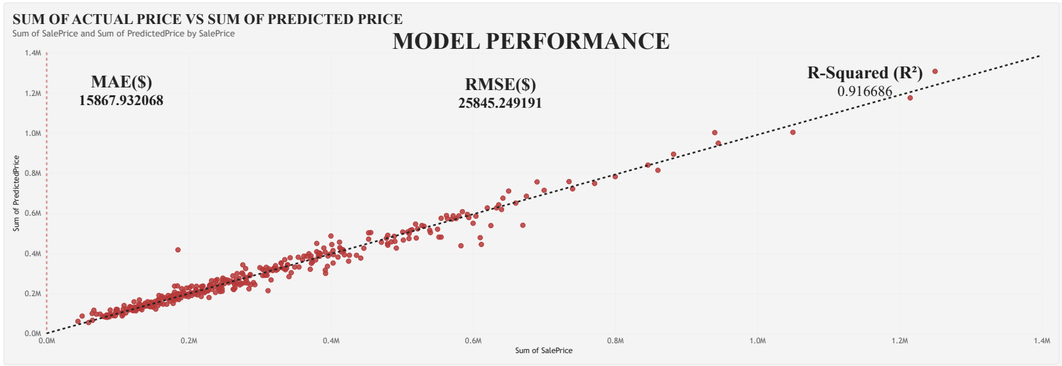

AVERAGE SALE PRICE

TTOTAL HOUSES SOLD

TOTAL AVERAGE PREDICTION ERROR

Average House Sale Price by Neighbourhood

Model Evaluation Conclusion

the model's performance was evaluated using MAE, RMSE and R-Square. The R-Square of 91.67% was achieved, indicating strong predictive performance in explaining house price variations. The MAE of $15867.93 shows the average prediction error, while the RMSE of $25845.25 suggests some larger prediction errors. Overall the model performs well, although further improvements could enhance prediction accuracy errors.
